SILVER AEROSPACE LLC

Capability Statement

Component sourcing and distribution support for aviation, marine and land systems.

Company profile

Founded in 2023 in California, Silver Aerospace LLC serves commercial operators and government procurement teams. Its leadership team brings 35 years of industry experience.

How we support a product line

We agree on the products, territories and buyer groups with the manufacturer. Our team qualifies requests by part number, quantity, required condition, delivery date and documentation before asking for a quotation.

From quotation to delivery

We coordinate pricing and availability with the designated product contact, communicate lead times to the buyer and follow the order through documentation, packing and international delivery.

Quality and supplier qualification

Our quality management system is ISO 9001 certified. For supplier qualification, request the current certificate and its scope. We review the documentation required for each order before shipment.

Partnership contact

Contact Silver Aerospace to discuss your product families, target markets and distribution goals. Our team can review territory, account coverage and reporting with you.

Aircraft platforms

C-130 Hercules and CN-235 transports, Beechcraft King Air turboprops and Gulfstream business jets.
